AGRICULTURAL SERVICE BOARD

CLUBROOT FIELD INSPECTIONS

Please be advised that Pest Inspectors will be scouting for clubroot disease and infection in canola fields until freeze-up, accessing fields via approaches.

Designated as a pest under the Agricultural Pests Act, Clubroot is a soil-borne disease which reduces yields of canola and other cruciferous crops. Clubroot is spread primarily through movement of soil and infected plant materials. Producers are encouraged to clean debris and disinfect equipment prior to moving to new fields to reduce the spread of clubroot to new areas.

Inspectors will follow sanitation protocols to prevent the spread of clubroot. Landowners of fields that test positive for clubroot will be notified in writing. Questions or concerns may be directed to the ASB Department at 780-657-3358.
